Hello Everyone!

Hope you are doing great!

Google India and Ministry of Electronics and Information Technology (MeitY) recently came together to launch a unique program, **"Build for Digital India" - Student Developers Solve for India** to give student developers and student tech entrepreneurs an opportunity to be a part of India's growth story where they can be the 'Agents of Change' by solving for the most pressing issues around them using technology. Do you know of such students in your network who are solving for India using tech?

Please share the below mailer in your network and with students who would be interested to be part of this program and showcase their work with us. We are looking forward to mentor those bright ideas and help them convert into real-world solutions. Let me know if you have any questions. Thanks!

You CAN share this announcement externally

Dear Student Innovators,

India today is full of opportunities for able student tech innovators like yourselves to build solutions. Healthcare, Agriculture, Traffic, Pollution, Women Safety, Education, Energy, Environment are just some of the areas that require scalable innovative solutions.

To give student tech entrepreneurs the opportunity to be a part of India's growth story where you can be the 'Agents of Change' by solving for the most pressing issues around you using technology, **Google and the Ministry of Electronics & Information Technology (MeitY)** have come together to launch the **"Build for Digital India" - Student Developers Solve for India** program.

This program will take student tech entrepreneurs who apply with their tech solutions, through a learning journey with rich technical resources and insightful mentorship sessions to convert your ideas into successful products.

You will go through 3 phases:

1. **Learning and Building**: In this phase, you will receive rich technical resources like online courses, codelabas, talks & more on Cloud, Machine Learning, Android and open source technologies.
2. **Mentorship:** Post the learning phase, teams can apply for mentorship to receive constructive feedback on your prototypes and products from Google's network of mentors and industry experts.
3. **Exclusive showcase opportunity**: The promising, scalable and innovative solutions will be highlighted in an exclusive showcase opportunity.

If you (and your team) have a clear idea of which India-specific problem you want to solve, apply before **October 13, 2019**! Check out the program website to register and for more details.

Do spread the word in your college and be a champion of change by mobilizing your college to submit entries to the program. Feel free to share this with your Entrepreneurship Cell and your faculty to encourage more participation.
